(Certification in Progress)

ABOUT

As the founder of King Industries, Mr. King has been building the Corporations legacy along side his brother, Justin King, since 2012. Mr. King has been managing projects and construction professionally since graduating New Mexico State University in 2005. In the beginning of his career he was contracted to design and manage aircraft components from concept to production. This involved designing while managing schedules and budgets, coordination with all other engineering disciplines to produce aircraft components. After several years he was asked to manage the production team's Kaizen group to drive efficiencies and promote continuous improvements. As the primary liaison for King Industries Corporation, he facilitates all aspects of projects ensuring an effective project management team that creates an atmosphere oriented to each client. With a wide range of project management experience from aircraft design and manufacturing to project development of FEMA and emergency declarations, Mr. King handles both the technical and administrative side of every project. As the CEO of King Industries, he embodies full ownership of the project scope, schedule, and budget providing the engineering focus to lead in developing solutions for long-term value to each client.

EXPERIENCE

For the past 12 years, Mr. King has been managing projects from aircraft structure to project development of FEMA and emergency declarations. He maintains strong rapport with leading outside partners including but not limited to; NMDHSEM, USACE, SHPPO, NMED, and FEMA. Mr. King facilitates program meetings to brainstorm and keep proper track of each project and it's progress while also planning and estimating the costs and schedules. His overall Engineering and Project Management experience is an outstanding addition for any project as he continuously assists communities with developing, funding, management, completion, and closeout of all projects.
